Currently, I am a teaching assistant (TA) for Computer System Design course under Professor Siva Ram Murthy. Along with designing assignments in addition to helping with and evaluating students' progress, I personally contributed solution manual for the course text-book named "Parallel Computers: Architecture and Programming". This solution manual which intelligently used crowdsourcing will be published next year. As a result, I have been honored as "**Star Teaching Assistant**" by my department for making a significant difference to the course where I helped plan logistics, designed and evaluated assignments, helped to make the solution manual of the course textbook and coordinate with other fellow Teaching Assistants and the Professor for the smooth conduct of the course. I will also be a teaching assistant in the coming semester for a different course and I hope to continue my efforts in making positive contributions to the course.

The following is the scanned copy of certificate that I have received from my department:

Department of Computer Science and Engineering
Indian Institute of Technology Madras

This is to recognize

Ishu Dharmendra Garg

as a

STAR TA

for his/her outstanding contributions as a Teaching Assistant
during the period
July-Nov 2017

S. Khamoorthy

Prof. Krishna Moorthy Sivalingam
Head of the Department
Dept. of Computer Science and Engineering
